The Advising Success Network Newsletter | November 2022

This month, we focus on the student journey at our institutions to make sense of the complex landscape of people, processes, and technologies students navigate to receive a multitude of student supports.

The Advising Success Network wants to hear from YOU! Please **let us know** about your own individual and/or institutional efforts to support the educational, personal, and career aspirations of your students. Being able to share those successes with others is what inspires change and action for student success.

What We're Reading

Advising Technology Across the Student Journey

As institutions seek to purchase new tools or enable additional features in a previously implemented solution, it is critical to consider the ways in which the existing systems may need to be restructured or modified to properly integrate and interact with one another. For institution leaders, IT teams, advisors, student support leaders, and the many others increasingly involved in procuring, implementing, or using advising technologies, navigating this landscape can be, in the words of one community college Chief Information Officer, "mind-meltingly complex and frustratingly inconsistent."

NEW from EDUCAUSE: Holistic Student Advising – A Model for Transformational Change

The Advising Success Network is proud to bring a visual synthesis of the research literature on how

advising transformation takes place – one that conveys the why, how, and when. This theory emphasizes the institutional-level factors, as well as individual and team-level redesign activities that research and theory suggest are important during an institution's capacity building and redesign efforts to improve equitable student outcomes.

Continuing the Conversation on Campus Safety

Safety is a chief concern on college campuses. For those of us who work in urban environments, the microscope we are under comes from a unique set of challenges. We need to help our university community understand that each of us plays a role in helping our environment to be safe for everyone.

Nine stakeholders that can make or break advising technology implementations

Institutions invest significant amounts of time, money, and effort into implementing the administrative and technological infrastructure supporting the advising process, often with decidedly mixed results. The Role(s) of Stakeholders in the Implementation of Advising Technology, a new report from Advising Success Network core partner EDUCAUSE, seeks to shed light on processes that contribute to institutions' successful implementation of advising technologies and focuses on identifying and describing the roles and responsibilities of key institutional stakeholders—a topic that has been under-researched to date.

Mission

Our mission is to help institutions build a culture of student success, with a focus on Black, Latinx, Indigenous, Asian, and Pacific Islander students, as well as students from low-income backgrounds, by identifying, building, and scaling equitable and holistic advising solutions that support all facets of the student experience.

Vision

Our vision is a higher education landscape that has eliminated race and income as predictors of student success through a reformed approach to advising, in which all students are supported through a seamless, personalized postsecondary experience that creates better personal, academic, and professional outcomes.
